DR. CHRISTIE PRENDERGAST

A female plastic surgeon addressing women's needs

SANTA MONICA, CA, October 1, 2019—With plastic surgeons plentiful, it is easy for women to fall down the rabbit hole of quick fixes. From Botox to boob jobs, when women age they often turn to plastic surgery to cure their aging woes.

Dr. Christie Prendergast is not only a Double-board Certified Plastic Surgeon, she is a woman looking to redefine misconceptions in plastic surgery. She is a woman who understands the effects of aging, and a doctor who wants to teach women how to embrace the aging process with grace—and the help of minimally invasive procedures. She is a female surgeon with women in mind.

“I love to customize beauty plans to address all areas of aging. Preventative, minimally-invasive beauty plans should be balanced and harmonious to enhance natural features.” – Dr. Christie

Born in Hong Kong and raised in Macau, Italy, Switzerland, Sydney, and the United States, Dr. Prendergast appreciates the differences ethnicity has on aging and customizes plans to address unique ethnic concerns. “Growing up with nine sisters all over the world has shaped my beauty influences and has helped me realize the need for curated beauty plans that remain timeless.”

Dr. Christie takes time to ensure that each patient’s individual needs and ethnicity are addressed for optimal, natural results. Her procedures including minimally-invasive facial rejuvenation, skin- tightening, body contouring, breast augmentation and breast reconstruction to name a few.

One of Dr. Christie’s passions includes helping women who have battled breast cancer. She reconstructs their breasts, allowing them once again to embrace the femininity they thought was lost. A mentor to patients and students alike, Dr. Christie recognizes how important her role is as a female surgeon and serves as an inspiration to many.

“Aging gracefully takes an artist to guide patients to interventions that deliver natural and balanced aesthetics.”

About Dr. Christie Prendergast:

Dr. Christie Prendergast overcame a disadvantaged upbringing to work her way through college and medical school. With just \$100 to her name, she worked a full time job while teaching organic chemistry part-time as a means to pay the bills. Through hard work and diligence, she studied both general surgery and plastic surgery to become the accomplished surgeon she is today. Dr. Christie is Double-Board Certified by the American Board of Surgery (ABS) and the American Board of Plastic Surgery (ABPS).
